Stationary Billing Management Software Requirement Structure & Flow.

Project Overview:

A web-based and multi-shop software that streamlines billing (manual & barcode-based), stock/inventory tracking, vendor management, purchase order handling, and financial reporting across multiple stationary shops with a centralized Master Admin.

1. Project Purpose:

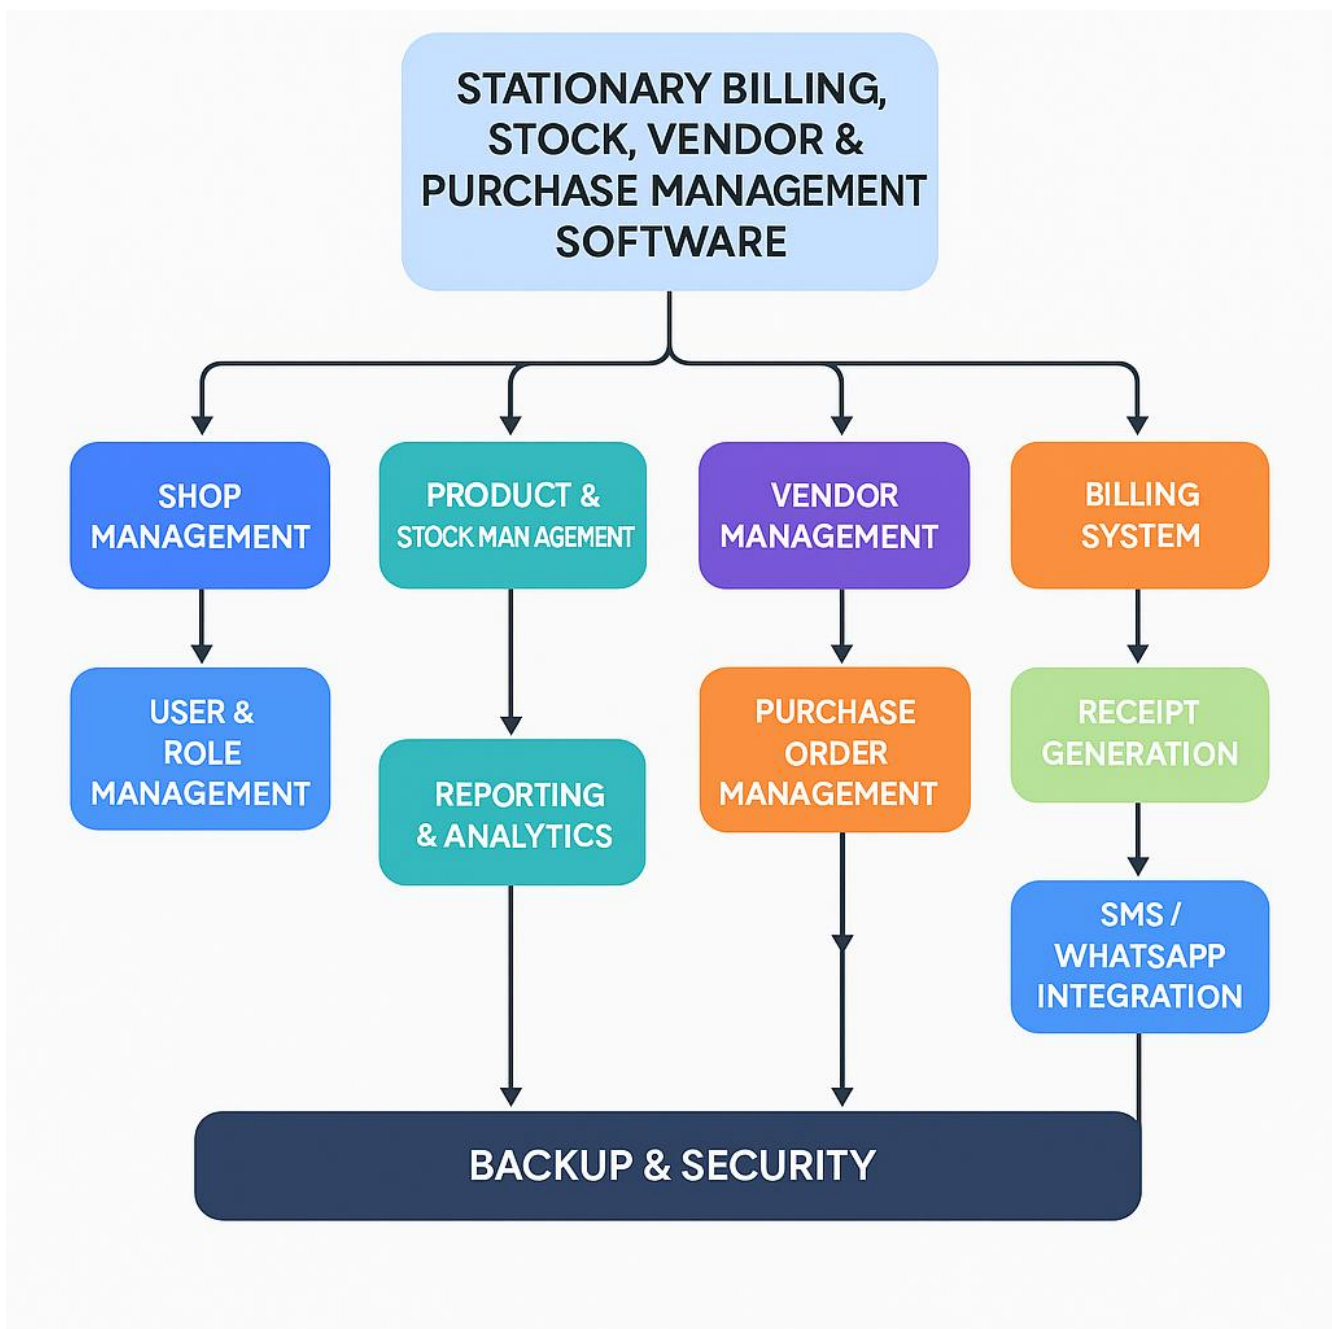

1. Automate entire sales, stock, purchase, and billing process.
2. Enable barcode/manual billing with GST support.
3. Maintain real-time shop-wise stock levels.
4. Manage vendor relationships, purchases, payments, and receipts.
5. Generate reports for sales, purchases, stock, and financials.
6. Improve operational transparency & efficiency.

2. Project Scope:

- **Master Admin for central control.**
- **Multi-shop management with shop-specific stock & sales tracking.**
- **Barcode & manual billing with tax, discount & multi-payment mode support.**
- **Vendor management & ledger.**
- **Purchase order issuance & tracking (with GRN & invoice match).**
- **Receipt generation (printable & WhatsApp share).**
- **SMS/WhatsApp alerts to customers & admin.**
- **Daily, monthly, and yearly reports (sales, purchases, payments, stock).**
- **Role-based access: Master Admin, Shop Admin, Cashier, Stock Manager.**

3. Project Flow:

4. User Types & Access Control:

4.1 Master Admin:

- Access Level: Full access across all modules.
- Responsibilities:
 - Create, edit, deactivate shops.
 - Assign stock to shops.
 - View global sales, stock, and purchase reports.
 - Manage vendors, products, tax rates, discounts.
 - System configuration, backup, and data security.
 - Create and manage all user roles.

4.2 Shop Admin:

- Access Level: Restricted to their specific shop.
- Responsibilities:
 - Manage shop-level stock.
 - Conduct billing.
 - Manage receipts, payments.
 - Monitor shop-specific sales and inventory reports.
 - Manage shop-specific users (cashiers, stock managers).

4.3 Shop Users:

- Types:
 - Cashier: Billing, receipt generation.
 - Stock Manager: Manage shop stock, record stock received.
 - Reports Viewer: View reports without editing access.

5. Shop Management:

5.1 Fields:

- Shop Name
- Shop Address
- GST Number
- Contact Details
- Opening & Closing Times.

5.2 Shop-wise Stock Assignment:

- Master Admin can assign stock to any shop from the central inventory.
- Option to set product-wise quantities, cost price, and applicable tax.
- System updates shop's stock accordingly.

5.3 Stock Transfer Between Shops:

- Initiate stock transfer from one shop to another.
- Define source and destination shops.
- Select products and quantities.
- Generate Stock Transfer Note (STN) with:
 - Transfer ID
 - Product Details
 - Source & Destination Shops
 - Transfer Date
- Status Tracking:
 - Initiated
 - In Transit
 - Received
- Logs for each movement.

6. Product & Stock Management:

6.1 Product Master

- Product Name
- SKU / Barcode
- Category
- Purchase Price
- Selling Price
- GST Rate
- Min Stock Level.

6.2 Stock Adjustments

- Stock Inflow:
 - Purchase from vendors.
 - Inter-shop transfers.

- Stock Outflow:
 - Sales
 - Damage/Expiry
- Adjustment logs with reason and date.

6.3 Alerts

- Low Stock Alerts
- Expiry Alerts.

7. Vendor Management:

7.1 Vendor Master:

- Fields:
 - Name, Contact Person, GST, Bank Details, Payment Terms.

7.2 Vendor Ledger:

- Track purchases, payments, outstanding balances.
- Payment methods recorded (Cash, Cheque, UPI).

7.3 Vendor Report:

- Purchase summaries, payment status, outstanding dues.

8. Purchase Order (PO) Management:

8.1 PO Creation:

- Generate POs for vendors with:
 - PO Number
 - Vendor Name
 - Expected Delivery Date
 - List of Products, Quantity, Purchase Rate

8.2 Goods Received Note (GRN):

- Record actual receipt of stock.
- Track damages/shortages.
- Link to corresponding PO.

8.3 Invoice Matching:

- Verify the vendor's invoice against the PO.
- Confirm quantities and pricing.

8.4 Payment Tracking:

- Record payments made against POs.
- Update payment status (Unpaid, Partially Paid, Fully Paid).

8.5 Notifications:

- Pending PO alerts.
- Delivery overdue alerts.

9. Billing System:

9.1 Billing Methods:

- Barcode Scanner
- Manual Product Search.

- Fields:
 - Auto-generated receipt number.
 - Shop & Customer Info.
 - Items purchased.
 - Payment method.
 - GST details.
- Options:
 - Print.
 - WhatsApp.
 - PDF download.

9.3 Receipt Generation:

- Apply discounts (percentage or flat).
- GST calculation.
- Multiple payment modes in a single transaction.
- Option to save customer details.
- Track pending payments.

9.4 Billing Features:

- Apply discounts (percentage or flat).
- GST calculation.
- Multiple payment modes in a single transaction.
- Option to save customer details.
- Track pending payments.

9.5 Billing Features:

- Apply discounts (percentage or flat).
- GST calculation.
- Multiple payment modes in a single transaction.
- Option to save customer details.
- Track pending payments.

10. Reporting & Analytics:

10.1 Sales Reports:

- Daily, Monthly, Yearly sales.
- Shop-wise and Product-wise breakdown.

10.2 Purchase Reports:

- Vendor-wise purchases.
- Payment status.

10.3 Stock Reports:

- Current stock
- Low stock
- Expiry stock.

10.4 Profit & Loss:

- Shop-wise
- Product-wise.

10.5 Export Options:

- Excel, PDF formats.

11. Admin Dashboard:

11.1 Widgets:

- Today's Sales
- Bills Count
- Low Stock Products
- Top Selling Products
- Pending POs
- Customizable notifications.

12. User & Role Management:

- Define roles (Master Admin, Shop Admin, Cashier, Stock Manager, Reports Viewer).
- Set permissions (View, Add, Edit, Delete).
- Track login activity and changes made by each user.

Technology:

- **Front-End:** Mobile App, Web application (HTML, CSS, Bootstrap, JavaScript, jQuery, Ajax, and JSON, Angular, React, Ionic etc.)
- **Server-side:** PHP, Node. JS, Java
- **Databases:** MySQL.
- **Framework:** CodeIgniter.

Additional Rounds of Approval and Associated Costs.

- **Two Included Rounds:** Each feature or development milestone includes two rounds of feedback and approval without additional charge.
- **Cost for Additional Rounds:** Any additional approval rounds beyond the initial two will incur a fee. The cost for extra rounds either will be a flat rate per round or charged at an hourly rate, depending on the complexity of the requested changes.
- **Approval of Additional Costs:** Before starting extra rounds, a cost estimate will be provided for client approval to ensure transparency.

Charges for New Points outside the Original Requirements

- **Scope of Initial Requirements:** The software development will proceed based on the requirements outlined and documented at the start of the project. Any new features, functionalities, or changes that fall outside the original documentation will be treated as new points.
- **Cost for New Points:** If new requirements or features are introduced after the initial requirements documentation is finalized, these will incur additional charges. The cost

will be determined based on the complexity, time, and resources required to implement the new point.

- Approval Process for New Points: A formal proposal will be provided for each new point, including an estimate of the cost and the impact on the project timeline. The client must approve the proposal before any work is undertaken.

The above price includes the list of the following services.

- Free Testing.
- Free On-site training to the user/staff for one day
- Free online Updates of the software
- Free Online technical support for one year from the date of installation
- Free unlimited training / re-training to your staff at our head office
